A Smart Digital Assistant for Your Digital Workplace

A partnership that makes work easier.

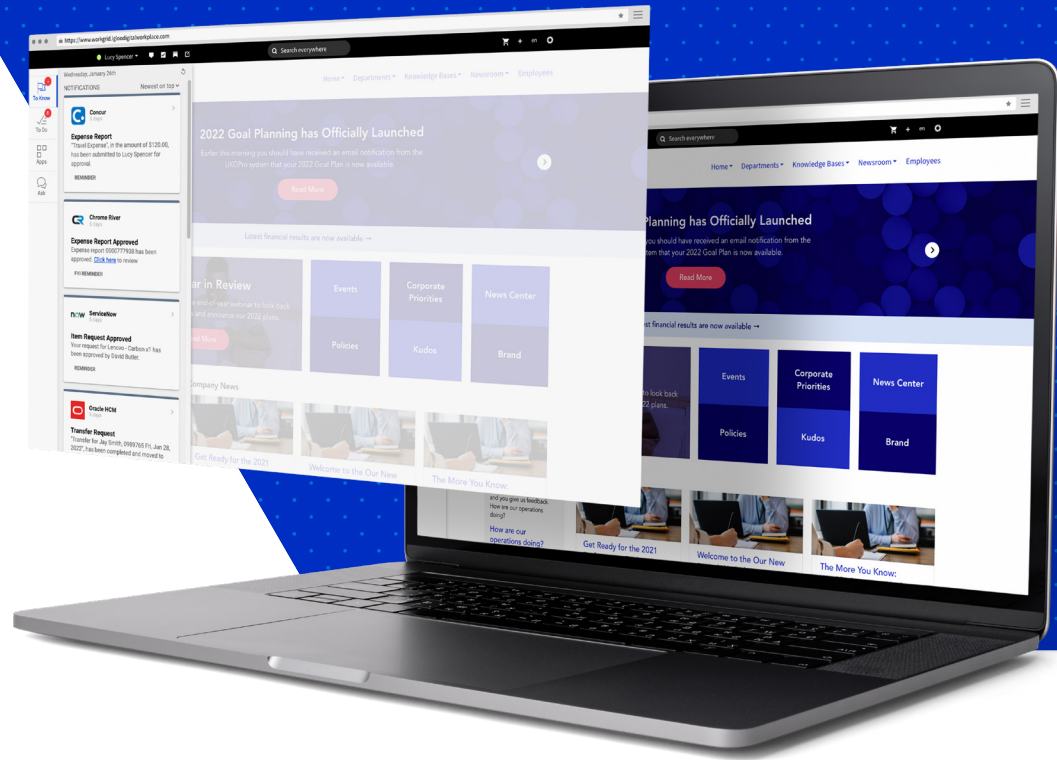

Igloo Software is the digital destination for your team and company-wide communications. Workgrid offers a solution to intelligently organize data and information from your business systems into a single, connected employee experience. Together, Igloo + Workgrid is a better way to work.

How it works

The Workgrid Digital Assistant integrates seamlessly into your Igloo digital workplace and acts as the connector to the common systems and tools found in your organization.

Enrich your employee experience

Workgrid abstracts notifications, communications, data, and tasks from critical business systems and delivers them to employees inside the Igloo digital workplace. The Workgrid Digital Assistant guides employees' attention to what they need to know and act on — enhancing productivity, focus, and engagement — in a personalized and intelligent experience. This helps employees focus on what matters most to ditch time wasters such as sifting through multiple streams of digital content.

Solve the challenges of digital friction

Missed company communications due to content overload

Lost productivity sifting through irrelevant or outdated information

Low engagement with communications

Multi-step processes that take employees outside of the digital workplace

Complicated and time-consuming actions from managing multiple digital channels

Key benefits

Promote relevant and contextual information

Streamline processes and approvals

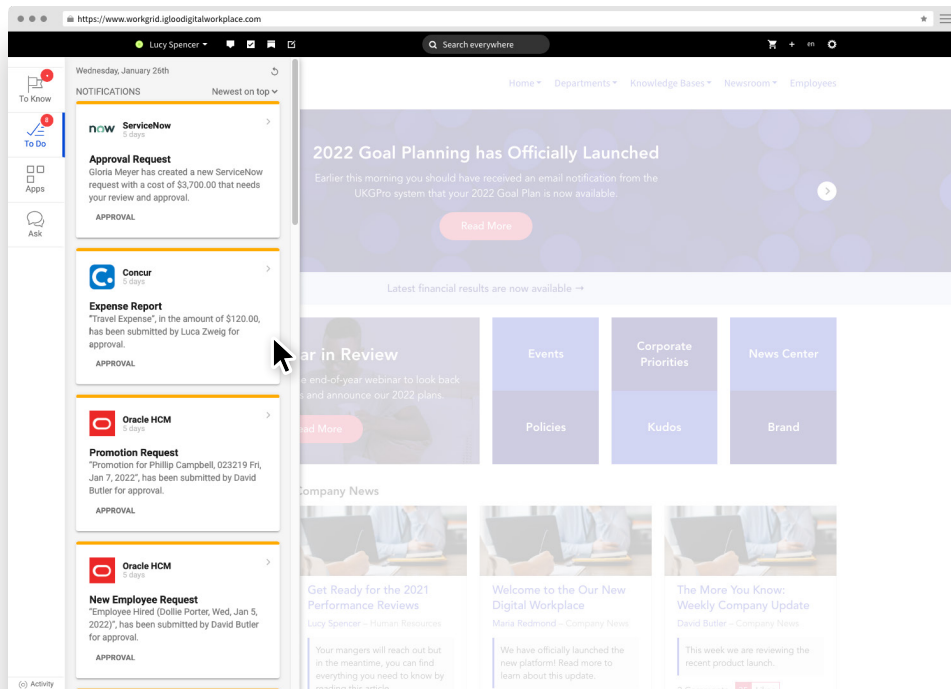

Automate tasks and workflows

Make information and data easier to find

Simplify interactions with enterprise systems

Supported out-of-the-box integrations

Ready to get started?

Visit workgrid.com/partner/igloo for more information.

Igloo is a leading provider of digital workplace solutions, helping companies move beyond traditional intranets to inspiring digital destinations that improve communication, knowledge sharing, collaboration, and culture. All Igloo solutions are 100% cloud-based, mobile-enabled, and integrate with leading enterprise and cloud apps.
