Help employees effectively engage with HR tech

Workgrid's guided attention technology is the first of its kind. It guides employees' attention to the information and action items they need most to be productive, improving the overall digital employee experience.
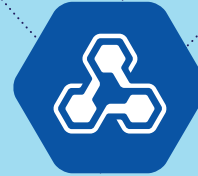

Workgrid abstracts data, notifications, and tasks from existing business systems and delivers them in the channels employee are already in - enhancing productivity, focus, and engagement. Workgrid:

- ✓ Surfaces the right notifications, signals, alerts, and information — wherever and whenever they're needed.

- ✓ Sends nudges for time-sensitive information or tasks that require awareness and action with Workgrid.

- ✓ Provides one-click access to key data, assets, and business applications.

Workgrid

Simplify the Digital Work Experience

- ✓ Make it easier for employees to find HR information — everything from policies to benefits information

- ✓ Aggregate HR system notifications and enable the completion of HR approvals in a single click

- ✓ Communicate important updates, recognize employees, schedule celebratory notifications, and send surveys

- ✓ Consolidate time off balances and payslip data for easy employee access

- ✓ Make benefit information and company protocols simple to find via a natural language chatbot

- ✓ Surface updates, including benefits enrollment, HR policies, and organizational values

- ✓ Suggest learning and upskilling opportunities, and promote new job openings
