

# Workgrid for Microsoft Teams

## It's time to put the "me" in Teams

Workgrid sets a new standard for how employees interact with enterprise technology. Forget about accessing multiple apps within Teams. With Workgrid for Microsoft Teams, everything employees need to focus on is centralized into a single experience, helping employees avoid app hopping and time-wasting context switching.

### Simplify your digital workplace experience

Workgrid integrates across your enterprise systems to guide employees' attention to what they need to know and do, enhancing productivity, focus, and engagement. Deliver fast and easy access to notifications, information, and job-related tasks from across all digital workplace systems, services, and applications — all within MS Teams.

Workgrid

**With Workgrid for MS Teams, you can put the tasks and information employees need right into the MS Teams app:**

- ✓ Deliver hyper-personalized targeted content based on role, location, or job function
- ✓ Surface notifications from business apps
- ✓ Aggregate tasks and approvals from digital workplace applications, like expense, HCM, procurement, and timesheet systems
- ✓ Promote relevant and contextual information to employees, such as job postings, learning management opportunities, training, campaigns, and more
