

# Partnering with Workgrid

## Partnerships for holistic digital workplace solutions

When it comes to helping organizations achieve their digital workplace goals, sometimes two companies are better than one.

Together, our strengths can create truly powerful digital workplace solutions for your customers.

### Simplifying work for a better employee experience

Workgrid simplifies the work day by enabling organizations to build and deliver modern digital experiences for their enterprise software.

Our digital assistant is available wherever employees work: on the intranet, via mobile app, and within MS Teams. It insulates employees from the complexity of the digital workplace while guiding their attention to the information and tasks that matter most.

### The Workgrid digital assistant:

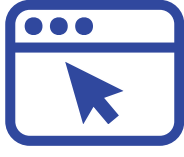

- ✓ Centralizes communications, notifications, and tasks
- ✓ Enables employees to act on tasks from multiple applications in a single location
- ✓ Makes it easier to find information and get fast, personalized answers to common questions
- ✓ Maximizes investments in existing technology

Workgrid

# Ideal partner profiles
